

bmcm: The "bavarian measurement company munich" introduces itself

Date: 10-02-2007 01:30 PM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [BMC Messsysteme GmbH \(bmcm\)](#)

Maisach/Munich/Germany. With the "PRESENTATION" catalog, a company profile of a special kind, BMC Messsysteme GmbH (bmcm) gives all interested customers the opportunity to get an impression of the longtime manufacturer for innovative measurement technology "made in Germany".

Since more than 15 years BMC Messsysteme GmbH (bmcm) develops and produces measurement technology true to the motto "From sensor to analysis". The product range comprises the full bandwidth of industrial PC-based data acquisition: measurement devices, data acquisition cards, measuring amplifiers, etc., culminating in the professional software for data acquisition and processing "NextView".

In this connection the compliance with commonly used technology standards and the compatibility of the product groups to each other plays an outstanding part, so that bmcm measurement technology can easily be integrated in existing systems.

With the years BMC Messsysteme GmbH continuously developed and extended the fields of activity. The "embedded PC technology" became an important product line in addition to analog and digital data acquisition.

Individual customer requests are implemented by custom-made products in the area of OEM (Original Equipment Manufacturer) and D2M (Design-to-Manufacturing).

With the philosophy "made in Germany" in mind, BMC Messsysteme GmbH proves that even today high-quality products

can be developed and produced successfully at an excellent price-performance ratio in Germany.

Starting the direct distribution of bmc products in July 2006 a completely new side was revealed: data acquisition available directly from the manufacturer.

These manifold developments were the reason to create a bmc profile. The "PRESENTATION" catalog shows, what the "bavarian measurement company munich" stands for – its philosophy, its products and a multitude of application examples.

The "PRESENTATION" catalog, as well as the product overviews "AMPLIFIERS", "DATA ACQUISITION" and "SOFTWARE" are available for free download at www.bmc.de or can be ordered directly at bmc (info@bmc.de).

*** About BMC Messsysteme GmbH ***

BMC Messsysteme GmbH was founded in 1994 as an independent corporation with headquarters in Maisach, app. 30 km west of Munich. Until today this autonomy could be kept, so that any affiliation to a business group never existed and is not intended for the future. bmc is one of the only German companies that completely develops and produces all products in Germany, which means quality "made in Germany" at an excellent price/performance ratio.

BMC Messsysteme GmbH serves two business areas:

* Measuring components and PC measurement technology *

This comprises a wide range of connection systems, measuring amplifiers, data acquisition systems, data loggers and the appropriate software.

www.bmc.de/us/prgr-products.html

* D2M (Design to Manufacturing) and OEM products *

BMC Messsysteme GmbH develops and produces electronic components according to customer specifications.

www.bmc.de/us/co-d2m.html

You will receive high-quality products manufactured already since the beginning of 2006 according to the RoHS directive. Of course, the corresponding documentation and CE test is always included.

A German documentation is obligatory for us, as well as an English description to be available to our international customers.
