Press release from: [Independent Long Island](#)

The Governor pro tempore of Independent Long Island (ILI), the Most Rev. Dr. Cesidio Tallini, after the discovery of the disappearance of the .MM (Myanmar) TLD from the global DNS, re-baptized the country of Myanmar with the new name of Burma. After that, he registered the new, more legitimate country with the Micronational Professional Registry (MPR). Then he registered the Burma Internet Liberation Organisation (BILO) and the Burmese Network Information Centre (BNIC) organizations with the MPR. He created a new .BU (Burma) TLD on the Cesidian Root, since ICANN -- a US government monopoly illegally established by the US Department of Commerce -- allows human rights abuses on its Internet to go entirely unpunished. Finally, he declared war on the illegitimate and tyrannical government of Myanmar.

"The goal of the deletion of the .MM TLD from the global DNS tables is the suppression of communications among peaceful Burmese protesters, and suppression of the free flow of news outside of the country. This is not only a violation of common law free speech protections, which have existed in some countries since the 18th and 19th centuries. This is also a violation of jus cerebri electronici, a 21st century legal principle of Cesidian law, and our government will not tolerate it. Independent Long Island has started rebuilding Burma's Internet by providing a safe haven and free embassy for its .BU TLD in the Cesidian Root (a root which recently launched even a .WACHT TLD to protest suppression and eavesdropping by the German government), and by this action we declare war on the illegitimate and tyrannical government of Myanmar! We have no fear of the criminal government of Myanmar, no fear of the German government, no fear of any government on earth that wishes to violate Cesidian law. We are convinced that the Almighty and his Firstborn shall judge us kindly on Judgment Day, and that countries that violate Cesidian law shall be utterly destroyed", the Governor said.

The Governor pro tempore of Independent Long Island will offer free working .BU domains to any Burmese national and free .BU domains to any company or organization that wishes to provide tangible support to the Burmese people with free services in the Cesidian Root. "I have started this .BU TLD or "Buddhafield", but people and organizations of good will around the world can help expand this Buddhafield with their own labor and resources, and promote kindness and freedom", the Governor said.

Burma Internet Liberation Organisation
