Press release from: [Group Technologies Inc](#)

Calgary, AB, October 9, 2007 - Group Technologies Inc, today announced the release of a Facebook version of their popular Groupboard multi-user whiteboard application.

First released in 1998, Groupboard is a real-time multi-user whiteboard and chat java applet that users can put in a web page by pasting in a few lines of HTML code.

The new Facebook version of Groupboard now allows users a simple way of putting a free multi-user whiteboard onto their Facebook page, which can then be used by their friends. In keeping with the simplicity of Facebook, no installation or registration is required.

The Groupboard Facebook application is available at:

apps.facebook.com/groupboard/
