Press release from: [BiCOM Inc.](#)

Diaton tonometer was presented at the International Vision Expo West and Conference, Las Vegas Nevada. Over 550 Ophthalmic Exhibitors and thousands of optometrists, ophthalmologists and other eye care professionals attended the event. Tonometry through the Eyelid is gaining momentum.

"Judging by the increase in public and private capital invested in the development of new products and services in the areas of eye care, eye disease, eye implants, pharmaceuticals, ophthalmic equipment and the like, the industry has grown dramatically throughout last few years. BiCOM Inc. plans to introduce more exciting devices in the upcoming year", says Roman Iospa, CEO of BiCOM Inc.

Now Diaton allows to do more through mass glaucoma screenings without the use of anesthesia drops and, more importantly, with no contact with cornea, since Diaton tonometer measures intraocular pressure through the upper eyelid, which in its turn does not require correction for corneal thickness and dramatically decreases a possibility of infection.

Vision Expo is a perfect opportunity for ophthalmologists and optometrists to obtain free training and to learn of the clinically proven benefits of Diaton (transpalpebral) tonometry.

"Diaton tonometry" is a unique approach to measuring intraocular pressure (IOP) through the Eyelid. Non-Contact (no

contact with cornea), no anesthesia or sterilization required with this pen-like, hand-held, portable tonometer.

More information on the device, including clinical trials data can be found at www.TonometerDiaton.com or by calling BiCOM Inc. at the toll free number 1-877-diatons (877.342.8667).

At the next event BiCOM will be presenting Diaton tonometer at the American Academy of Optometry, Tampa, FL and Thailand Ophthalmology Conference, please visit the website for details on any future events.
