Press release from: [DNA Solutions PTY Ltd](#)

DNA Solutions continues to strive in to new territories with their second office opened in the Middle East.

DNA Solutions PTY Ltd. is delighted to form a strategic alliance with BeiINP, based in Beirut, Lebanon. BeiINP a diagnostic company has officially agreed to collaborate with DNA Solutions & its core products. "DNA Solutions continues to offer and operate our services in to new & emerging markets, we're very pleased to be working with BeiINP who are a high calibre partnership for DNA Solutions. With several new products due to be launched, we feel this is a terrific market in which to promote our portfolio," said Dan Leigh, DNA Solutions Director of Marketing. "BeiINP philosophy of use is parallel to that of ours & with an agreed formula we're looking forward to offering Lebanese clients our full array of DNA testing services."

BeiINP is looking forward to launching a variety of services focussed in Arabic & working in tandem with DNA Solutions on a variety of new & existing concepts. DNA Solutions advanced testing standards offer peace of mind in the need to quickly and accurately determine biological relationships. Due to laboratory initiatives, accuracy of analysis is much increased as opposed to the industry standard. DNA Solutions products provide increased loci testing of biological samples that is considerably more accurate than other companies. "Introducing, educating & providing a highly accurate service, that's manageable & cost effective to clients is our overall aim. This will benefit all concerned and will enable the end user to resolve any doubts regarding any DNA relationship issues they may have," said Mr. Leigh.

DNA Solutions was established in January 1997. It is focused on providing reliable and confidential global DNA products, including 'peace of mind' testing for consumers and legal testing for courts and legal disputes. Services include paternity/maternity testing; sibling verification; DNA storage & preservation, ancestry, and profiling. As the first pioneering company to offer home testing kits it has established itself with over 30 offices worldwide, DNA Solutions is synonymous with advanced accuracy DNA analysis
