Press release from: [Simplifile, LC](#)

Simplifile and CSA contract to integrate systems and cooperatively market resulting eRecording services to CSA-enabled counties and thousands of Simplifile “submitter” customers nationwide.

MONTANA – November 05, 2007

Working to provide their mutual customers with industry-leading eRecording services, Simplifile and Montana-based Computer Software Associates (CSA) today announced that they have formed a strategic alliance for the purpose of integrating and cooperatively marketing Simplifile eRecording and CSA Document Pro systems.

The alliance calls for the two companies to first complete the seamless integration of their respective eRecording and document archiving systems, allowing documents electronically filed by Simplifile “submitter” customers such as title companies, law offices and banks to be received, reviewed, recorded and returned to those same submitters by counties running CSA Document Pro systems. The accord also provides for Simplifile and CSA to cooperatively market the alliance and resulting services to their mutual customers, including Simplifile submitters and CSA counties.

“Simplifile has chosen to deploy a partner approach to building the nation’s premier eRecording network that services both document submitters and county recording jurisdictions,” said Paul Clifford, President of Simplifile. “We are delighted to welcome CSA into our alliance partner program. CSA provides state-of-the-art county government indexing and imaging products and services, and we look forward to offering the many advantages of Simplifile eRecording Services to the submitter customers served by CSA-enabled recording jurisdictions.”

More than a trend in land record document submission—eRecording is a government priority at federal, state and county levels across the country. eRecording is the process of submitting, receiving, and processing, via a secure Internet site, documents for recording that have traditionally been delivered to the county for recording by runner, express mail, or courier service. eRecording offers the thousands of submitters nationwide that are filing documents into eRecording-enabled counties the ability to simplify, accelerate and enhance all aspects of the recording process.

“Simplifile is a pioneer and driving force in the development and adoption of eRecording services,” says Pat Ryan, President of CSA. “We are excited about this partnership and look forward to providing our mutual customers with eRecording solutions designed to enhance the effectiveness and efficiency of their offices.”

Individuals and organizations that do business with Simplifile and CSA can contact the two companies directly for information on how they can benefit from this strategic alliance.

About Simplifile

Simplifile provides innovative, simple, and secure electronic recording services via the Internet for a wide variety of customers, including title companies, banks, attorneys, lien filers, and county and state government jurisdictions. Our eRecording services accelerate document recording and simplify document workflow processes, significantly reducing costly overhead associated with traditional submission and recordation methods while improving client service levels dramatically.

Simplifile is focused on building the industry's de facto eRecording network. As such, we provide a streamlined yet scalable approach to electronic recording tailored to customers of all shapes and sizes. For more information on how Simplifile can benefit your organization, call 800.460.5657 or visit www.simplifile.com.

About CSA

Computer Software Associates (CSA) provides a full line of comprehensive, reliable, windows-based products designed exclusively for county governments. Document Pro, CSA's Indexing and Imaging solution, was designed to meet the ever demanding and changing requirements of the Recorder's office by streamlining the workflow process. The users of the Document Pro software report that the software is comprehensive yet intuitive and easy to use. Our support staff is knowledgeable about the indexing and imaging requirements of each state that we service, so we can tailor functionality and reports to meet state-specific requirements.

Based in Billings, Montana, CSA was founded in 1982 and serves clients in an eight state region. Our commitment is to achieve excellence in every endeavor by providing our customers with "total support from a single source."
