Press release from: [e-Mobile Software, Inc.](#)

Houston, Texas, USA – Nov 03, 2007 – e-Mobile Software, Inc. today announced "e-Mobile GPS Traffic", adding another title to its popular LBS (Location Based Service) product line.

Based in Houston, Texas, e-Mobile Software, Inc. is a leading mobile software development company, currently offers software and solutions for Windows Mobile, BlackBerry and Symbian devices.

"e-Mobile GPS Traffic combines GPS, traffic map, traffic alerts, traffic reports together and provides a full traffic picture to users. With GPS powered devices, the application filters out all non-relevant data and provides what's around the user. We feel that e-Mobile GPS Traffic offers the best solution on the market in terms of functionalities, easy of use, and cost of ownership.", said Wayne J, President of e-Mobile Software. "It is tailored towards today's mobile user community. This application makes it so handy and easy to use with clicks of button", he added.

e-Mobile GPS Traffic runs on internet enabled Windows mobile Pocket PC, BlackBerry 8800, 8300 and Curve series and Symbian S60 3rd Edition devices.
