

BMC Messsysteme GmbH first-time represented at PRODUCTRONICA 2007

Date: 11-06-2007 07:31 PM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [BMC Messsysteme GmbH \(bmcm\)](#)

Maisach/Munich/Germany. The "bavarian measurement company munich" (bmcm), manufacturer for PC-based data acquisition and PC technology continues its course of expansion. Under the motto "From sensor to analysis" BMC Messsysteme GmbH (bmcm) presents itself for the first time as a direct distributor at the World's leading trade fair for electronics production in Munich.

Productronica comprehensively represents the market for electronics production and the special technologies used in micro-manufacturing at the highest international level. As a stage for trendsetting technologies it is held every uneven year alternating with Electronica. Productronica at the high-tech location Munich is a venue for investors and experts from economy, as well as for the international technical and business press.

For the manufacturer of innovative measurement technology and embedded PC technology it is almost a home field advantage: Based in Greater Munich BMC Messsysteme GmbH (bmcm) demonstrates its market presence in the category "Test and measurement, quality assurance".

Through the years the concept of BMC Messsysteme GmbH "made in Germany" has been successful: All products are developed and produced in Germany. For bmcm the realization of user-friendly and high-quality solutions is decisive to be able to compete internationally - and all this at an excellent price-performance-ratio.

The direct line to the customer was established by setting up the direct distribution in 2006. All components of a measurement chain, such as sensors, measuring amplifiers, connecting technology, data acquisition systems and software are available directly from the manufacturer and perfectly adjusted to each other - the customer gets everything from one source,

which mostly proves to be an unbeatable advantage.

At Productronica 2007 BMC Messsysteme GmbH introduces their products, concepts and philosophy. The visitors will be surprised by some new products setting a course in measurement technology.

BMC Messsysteme GmbH invites all customers or other interested parties to meet them at Productronica 2007 in the New Munich Trade Fair Center (Area A1, west entry, booth 266). Free guest tickets can be ordered online on the bmcm website. (→ www.bmcm.de)

*** About BMC Messsysteme GmbH (bmcm) ***

BMC Messsysteme GmbH was founded in 1994 as an independent corporation with headquarters in Maisach, app. 30 km west of Munich. Until today this autonomy could be kept, so that any affiliation to a business group never existed and is not intended for the future. bmcm is one of the only German companies that completely develops and produces all products in Germany, which means quality "made in Germany" at an excellent price/performance ratio.

BMC Messsysteme GmbH serves two business areas:

* Measuring components and PC measurement technology *

This comprises a wide range of connection systems, measuring amplifiers, data acquisition systems, data loggers and the appropriate software.

www.bmcm.de/us/prgr-products.html

* D2M (Design to Manufacturing) and OEM products *

BMC Messsysteme GmbH develops and produces electronic components according to customer specifications.

www.bmcm.de/us/co-d2m.html

You will receive high-quality products manufactured already since the beginning of 2006 according to the RoHS directive. Of course, the corresponding documentation and CE test is always included.

A German documentation is obligatory for us, as well as an English description to be available to our international customers.
