Press release from: [e-Mobile Software, Inc.](#)

Houston, Texas, USA – Nov 12, 2007 – e-Mobile Software, Inc. today announced "e-Mobile GPS Companion" for Windows mobile devices, BlackBerry and Symbian S60 devices.

Based in Houston, Texas, e-Mobile Software, Inc. is a leading mobile software development company, currently offers software and solutions for Windows Mobile, BlackBerry and Symbian devices.

"e-Mobile GPS Companion was designed to answer basic questions like 'Where am I', 'How do I get there, and what is the turn-by-turn direction', 'I am totally lost, how do I describe where I am?' etc. Besides these mapping functionalities, e-Mobile Companion goes a step further and adds convenience and richness to people's social life, it helps people to connect and share information." said Wayne J, President of e-Mobile Software. "e-Mobile GPS companion helps you find services around you, like a location based service dictionary. It also allows friends to share locations among themselves, so they can easily arrange a get-together." added Wayne J.

e-Mobile GPS Companion runs on internet enabled mobile devices with access to GPS. (It supports both GPS on and off mode, so it will also work without GPS).
