Press release from: [TOPEX](#)

Agency: **TOPEX**

TOPEX announced his presence at Regional Broadband Conference for CEE an Imperial Communications event called "Creating Technological Innovations" and held on 29 of November at Intercontinental Hotel, Bucharest.

IC conference provided the participants with all the knowledge they need to grow their business in the telecoms industry. The competitors outlined their strategies, found out what key issues are shaping the carrier business services and explored the opportunities that will help their organization thrive.

This regional broadband event gathered senior level speakers from the world leading carriers presented in interactive panel sessions that provided the audience with the latest CEE telecom strategies and knowledge on wholesale, VoIP, broadband, mobile, managed services and more.

On behalf of TOPEX, Mr. Radu Balaci, Business Development Manager in the company, sustained a presentation called "NGN and IMS architectures for VOBB networks" and acquainted the attendees with information about VoIP technology challenges and about the necessity for Broadband.

VoBB standardization, benefits, challenges and deployments, TOPEX VoBB NGN/IMS products and TOPEX products applications and enterprise solutions were some of the subjects handled in TOPEX presentation.

"Imperial Communications offered us the opportunity to be a part of excellent networking at the conference with important speakers and attendees from companies like Ixia, Romtelecom or Avocent. This was a chance to learn about the latest products and services and took advantage of the cross-industry nature of the event and gained fresh perspectives from industries outside our own." said Mr. Constantin Dumitrescu Sales and Marketing Director at TOPEX.

The Regional Broadband Conference for CEE displayed the most important technologies of the future in the region and the experts discussed different topics and developments.
