PLANO, TEXAS – December 17, 2007 – The Texas Clinic at Prestonwood (TTCAP), a new medical facility that promises to combine some of North Texas' most advanced healthcare technology with a carefully chosen and sophisticated group of medical practices, has opened its doors to the public. Located at Plano Parkway and Marsh Lane in Plano, the new facility's first practice group, Sleep Healers Sleep Diagnostics, recently welcomed patients to its resort-quality sleep labs. All practice groups are anticipated to be in place by early 2008, making The Texas Clinic at Prestonwood one of the nation's most advanced, multi-specialty outpatient medical centers.

The practices are expected to open on a staggered basis through early next year, with several openings projected through the end of 2007. Apex Emergency Care, one of North Dallas' most comprehensive emergency care facilities and Prestonwood Urology are scheduled to open their doors on Monday, December 17, with Heart First Cardiology Center opening on Tuesday, December 18. These openings will be followed by the Prestonwood Surgery Center during the week of December 26. In the meantime, final testing and calibration is underway on North Texas' first Siemens 128-slice dual source CT scanner and first Varian Trilogy Linear Accelerator with on-board CT and x-ray imaging. These cutting edge diagnostic and treatment tools will be found at the Prestonwood Imaging Center and Verity Radiation Therapy Center, respectively, and are two of the reasons why The Texas Clinic at Prestonwood is expected to attract patients from around the region.

The Texas Clinic at Prestonwood offers patients an advanced multi-specialty destination for complete wellness, providing an assortment of medical treatments and services. When fully tenanted in early 2008, TTCAP will house Apex Emergency Center, Prestonwood Surgery Center, Prestonwood Urology, Team Orthopedics, Prestonwood Imaging Center, Verity Radiation Therapy Center, Heart First Cardiology Center, Sleep Healers Sleep Diagnostics, The Hope Oncology Center, TLCEdge Surgical Weight Loss plus a variety of other complementary, advanced and specialized medical practices.

Set on 4.17 acres, the 63,000 square foot medical office building features some of the most advanced medical technology in North Texas, including the 128-slice dual source CT noted earlier, North Texas' first Varian Trilogy Linear Accelerator, one of the few Siemens 3-Tesla MRI units outside a hospital in the area, a Hologic Digital Mammography unit, DEXA and 3D/4D Ultrasound, 6 fully-equipped luxury sleep labs and two vaults for delivery of Image-Guided Intensity Modulated Radiation Therapy (IMRT) and Stereotactic Radiosurgery.

The building features a dramatic two-story, steel and concrete design by Jonathan Bailey Architects, considered the premier medical architectural firm in the world. Its covered, drive-up entrance, easy access, two-level parking garage and ample surface parking combine to create a convenient patient-friendly experience.

The Texas Clinic at Prestonwood is located at 6957 W. Plano Parkway (Plano Parkway at Marsh Lane) in Plano, Texas.
