

A new racing team emerges to push the limits of Second Life racing

Date: 12-31-2007 03:54 PM CET

Category: [IT, New Media & Software](#)

Press release from: [KC Motorsports](#)

KC Motorsports is a multi-discipline race team founded by Kandy Tomorrow (formerly of Team Redline Racing) and Caine Beresford (formerly of Team Pixel Props) in November of 2007.

Originally founded as an open-formula racing team based out of MyControl Speedway, KC Motorsports has rapidly expanded into various disciplines of Second Life racing, including speedway racing at Fairgrounds Speedway and Adam Petty Superspeedway and the ultra-competitive MotoSL series.

Skill, precision and at times a touch of luck, backed up with the strong combination of youth, experience and nerves of steel, will see KC Motorsports dominating the racing community of Second Life.

Caine Beresford, designer of his Porsche 365A Speedster Replica, cuts a dashing figure as he careens around the track at MyControl laying down some blistering speeds (latest track speed at MyControl is 0:16.068 seconds) which has seen him leap ahead of other racers and given KC Motorsports first and second rankings at MyControl. But it's Kandy Tomorrow in her Midnight Thunder race car who will be throwing the gauntlet down to other racers at MyControl as she lays down scorchingly fast times with a MyControl lap record of 0:13.514 seconds.

KC Motorsports is built on an ethos of professionalism, sportsmanship and good racing and is destined to be a major force to be reckoned with in the world of Second Life racing.
