

enCentro launches affordable and high-quality IPTV Solutions

Date: 02-04-2008 07:31 PM CET

Category: [IT, New Media & Software](#)

Press release from: [enCentro](#)

Lisbon, February 4, 2008 - Based in Europe, enCentro is a new player in the international IPTV market with range of products that promises to revolutionise the IPTV Market in terms of affordability, reliability and scalability.

enCentro believes that with the evolution of Communications and Network Technologies, and the convergence to full IP Networks, the delivery of video entertainment over IP infrastructure has become a viable opportunity to gain competitive edge and maximize revenue potential, thus it has created the ideal solutions that cover most markets relevant to IPTV implementations.

enCentro's solutions enables Telco, Hospitality and Corporate Customers to provide Interactive Video Content, thereby leveraging Customer Relationships and existing network infrastructures, and capitalizing on the global rising interest in advanced Interactive Video content.

enCentro's current IPTV products are:

- centroFRONT - IPTV Middleware Servers designed to be a highly affordable, reliable and scaleable IPTV Middleware implementation for IPTV infrastructures.
- centroMEDIA – VoD Servers designed to be a highly affordable and reliable scaleable content streaming server for implementation in IPTV, Video-on-Demand, Audio-on-Demand, and Pay-per-View infrastructures. In addition, the centroMEDIA servers are designed to stream a very high number of simultaneous streams.
- centroSTREAM – DVB to IP Gateway Servers designed to be highly affordable, reliable and scaleable DVB-S / DVB-S2 to IP gateway for implementation in IPTV infrastructures. It is able to receive both encrypted and free-to-air channels and stream these onto an IP network.

The launch of these products promises to be the first step in enCentro's long term IPTV strategy.
