

## Tonometer Diaton Scores a Wining Goal at Barcelona ESCRS European Cataract and Refractive Surgeons Congress

Date: 02-11-2008 01:50 PM CET

Category: [Health & Medicine](#)

Press release from: [BiCOM Inc.](#)

Trans-scleral and Trans-palpebral (through the Eyelid) Tonometry now allows surgeons to determine Intra-Ocular Pressure (IOP) shortly after the surgery. The Congress and Exhibition of the 12th ESCRS Winter Meeting is being held in Barcelona, Spain.

BiCOM, Inc. represents and supports tonometer Diaton in over 30 countries. BOOTH#36

This new transpalpebral methodology has received the Gold Medal at the International Exhibition of Innovation Research and New Technology - "Brussels Eureka" & the Gold Medal at the International Exhibition of Research and new Technology in Geneva. Portability, safety and simplicity make Tonometer Diaton ideal for a wide range of applications: for mass screening of the population, at the patient's bedside, in geriatrics homes, in children hospitals, for the military and for home use.

Diaton Tonometer is intended for use by Inpatient & Outpatient Clinics such as Hospitals, Emergency Rooms, Nursing & Elderly Homes, General & Specialty Practitioners as well as Ophthalmologists and Optometrists.

Tonometer Diaton is the perfect solution in the following cases when the use of other devices is problematic or impossible:

- mass prophylactic screening of patients;
- IOP control during clinical observation of glaucoma patients;
- ortoclinostatical probe, as an additional test to diagnose glaucoma and during select the adequate hypotensive therapy;
- ophthalmotone monitoring (even at night time);
- IOP measuring during contact correction (lenses are not taken out);
- IOP measuring in immobilized patients;
- IOP measuring in children;
- on patients with the following conditions: chronic conjunctivitis, cornea pathology, including keratitis, keratone, cornea dimness, after penetrating keratoplastics, keratoprosthesis, laser refractive correction of the eyesight, high degree of ametropia, astigmatism;
- on patients with medicinal allergies;
- Lasik/ PRK (recent clinical trials have proved that Diaton is the only device that can be used for IOP measurement right after these surgeries);
