

## **Diaton Tonometry a Glaucoma Exam through the Lid is Presented at SECO International 2008**

Date: 02-25-2008 03:31 PM CET

Category: [Health & Medicine](#)

Press release from: [BiCOM Inc.](#)

Diaton tonometer a Glaucoma Exam through the Eyelid is presented at SECO International on Feb 27-March 2. Diaton tonometry will be showcased by an industry leader in pre-owned and new optical and ophthalmic equipment Vision Systems Inc (VSI). BiCOM Inc. will support with demo and training at Booth 1243.

Vision Systems Inc. (VSI) will be featuring Trans-Scleral Tonometer Diaton, Patternless Edger's, Traditional Lane and Pre-Test Equipment, HRT Retinal Tomographers and Fundus Cameras for optometrists, ophthalmologists, opticians, and ophthalmic professionals at all career levels.

SECO 2008 is designed for eye care professionals who wish to expand their skills and professional knowledge, acquire new skills or professional accreditations, and develop networking and professional relations. SECO provides eye care professionals everything necessary to build and maintain a successful practice.

SECO 2008 is conveniently located in Building A of the Georgia World Congress Center (GWCC) in Atlanta, Georgia.

BiCOM Inc, a Master distributor of tonometer Diaton is pleased to cooperate with VSI, an international leader in optical and ophthalmic equipment to introduce the unique Diaton trans-scleral and trans-palpebral tonometry in order to jointly challenge Glaucoma, a "silent thief of sight", that carries an ever increasing threat of causing blindness as the aging population is growing in US and abroad.

Mr. Iospa has pointed out, "Now Diaton tonometer allows to do more through mass glaucoma screenings in adults and children without the use of anesthesia drops and, more importantly, with no contact with cornea, since Diaton tonometer measures intraocular pressure through the upper eyelid, which in its turn does not require correction for corneal thickness and dramatically decreases a possibility of infection. "

SECO 2008 is a perfect opportunity for ophthalmologists and optometrists to obtain free training and to learn of the clinically proven benefits of Diaton (trans-palpebral) tonometry.

"Diaton tonometry" is a unique approach to measuring intraocular pressure (IOP) through the Eyelid. Non-Contact (no

contact with cornea), no anesthesia or sterilization required with this pen-like, hand-held, portable tonometer.

More information on the device, including clinical trials data can be found at [www.TonometerDiaton.com](http://www.TonometerDiaton.com) or by calling BiCOM Inc. at the toll free number 1-877-diatons (877.342.8667).
