

## GS1 Standards-Based Global Supply Chain Solution Webinar

Date: 04.04.2008 - 12:28

Category: [IT, New Media & Software](#)

Press release from: [epcsolutions](#)

Webinar scheduled for March 13th at 2:00 PM ET.

Great Falls, VA - epcSolutions invites you to a webinar on supply chain management using GEN2 RFID on March 13th at 2:00 PM ET with speakers Kevin Kail, CEO and Chuck Williams, CTO, epcSolutions.

During this webinar, epcSolutions will demonstrate the three supply chain management flows:

- The product flow - GDSN and RFID
- The information flow - B2BN and RFID
- The finances flow - B2BN and RFID

The product flow includes the movement of goods from a supplier to a customer, as well as any customer returns or service needs and leverages the GS1 standards for product information (GDSN). The information flow involves the GS1 standards for Business to Business Networks transmitting orders and updating the status of delivery (EDI). The financial flow consists of credit terms, payment schedules, and consignment and title ownership arrangements.

We will also demonstrate how RFID can be used to enhance supply chain management. Although radio-frequency identification technology can be used in a broad range of applications, the focus is changing now to the supply chain. RFID will have a significant impact on every facet of supply chain management—from the mundane, such as moving goods through loading docks, to the complex, such as managing data as information about goods on hand is collected in real time.

epcSolutions' GS1Net3 is the world's first collaborative platform for global supply chain management. During this webinar we will demonstrate the flow from creating and synchronizing product information, placing orders for product and tagging the product for shipment. By using GS1Net3, this can be accomplished with GTINManager, which manages the product data, DocManager for the management of the documents, and RFIDTagManager, which handles the tagging and shipment of products.

We invite you to join us and to hear about our solutions for the global supply chain.

About epcSolutions

epcSolutions, Inc. is the leading provider of RFID compliance software to the Wal\*Mart and DoD supplier community. epcSolutions' GS1Net3 application suite implements the GS1 System, a series of standards designed to improve supply chain management. The GS1 System includes: BarCodes - Numbering and bar coding; eCom - EDI (Electronic Data Interchange); Global Data Synchronization Network (GDSN) - data synchronization; EPCglobal - RFID (Radio Frequency Identification). The "Any Asset, One Network" application suite allows users to manage all four asset types found in a typical business: Work in Process, Finished Goods/Inventory, Fixed Assets and People.
