

Technoriver Barcode Developer Control Adds Support for GS1-DataBar

Date: 03-11-2008 01:23 PM CET

Category: [IT, New Media & Software](#)

Press release from: [TechnoRiver Pte Ltd](#)

Technoriver is pleased to announce the release of SmartCodeDeveloper 3.0, a robust control for adding barcodes to .Net applications. (Visual C++.Net, Visual Basic.Net, Visual C#.Net and Borland Delphi.Net.)

This version includes the important barcode family GS1-DataBar, which is expected to be the next generation barcode used on many trade items.

The control is feature-rich and will work in different scenarios like Crystal Reports, Web Services, Databinding, MS SQL 2005 Reporting Services, WPF (Windows Presentation Foundation) and XBAP. It is written in 100% .Net managed code, and offers all the features necessary for an advanced barcode control, like complete UCC/EAN multipart support, checksum options, human readable styles, rotation, 2D barcodes, and image resolution.

SmartCodeDeveloper supports the following linear bar code symbologies :

Code39, Code128, Code128A, Code128B, Code128C, Code39ASCII, Interleaved 2 of 5, ITF14, EAN13, ISBN, ISSN, UPCA, UPCE, EAN8, UPC Extension 2, UPC Extension 5, UCCEAN128 (All industry Application Identifiers like SSCC-14, SSCC-18 etc.), Code93, Rational Codabar, MSI (Modified Plessey), Standard 2 of 5, Postnet, RSS14 (Reduced Space Symbology), GS1-DataBar.

2D Barcodes supported are

Data Matrix, QR Code. MicroQR and PDF417.
