

Chevrolet Captiva - Latest Offering from General Motors India

Date: 03-12-2008 06:03 PM CET

Category: [Tourism, Cars, Traffic](#)

Press release from: [General Motors India](#)

Chevrolet Aveo U-VA, a premium hatchback from General Motors is a combination of modern Italian design, generous list of features and roomy interiors. It's stylish and incredibly spacious five-door set a new benchmark in its segment in terms of product attributes.

With a class-leading wheelbase and overall length, the Aveo U-VA is incredibly spacious. It can seat five adults comfortably thanks to its generous legroom and shoulder room. There are plenty of storage locations in the cabin such as cup holders in the front centre console that are flexible and can take cups of various sizes, a cup holder towards the rear of the floor console for rear occupants, dual storage areas on the instrument panel, a deposit box in the centre console and a ticket clip in the driver's sun visor. Its relatively low height of 1,495 mm underlines the dynamism of this new vehicle, a characteristic that is also expressed in its sporty design. Circular-theme tail lamps with jeweled elements complete the sporty look.

The Aveo U-VA scores high when it comes great to passenger comfort and the smallest of details. Double folding rear seats with a 40:60 split backrest on the top-end LT model provide amazing flexibility. A rear windscreen wiper and defogger, 14-inch alloy wheels, a leather gear knob, front fog lamps, and a digital clock are just a few of the amenities offered in the LT model.

Exceptionally high torsional rigidity and crash stability is probably the most appealing feature of the Aveo U-VA. The body structure forms a passenger compartment safety cage that runs from the front door hinge pillars to the A-pillars to the roof rail, back to the reinforced B-pillar and C-pillar and includes the rocker panels. The car also features 2.5-mph impact-proof front and rear bumpers, which are a boon in urban traffic in which minor collisions are unavoidable. The chassis of the Aveo U-VA has undergone rigorous validation, notching up nearly 2 million km of testing. In combination with its torsion-resistant body, this ensures excellent handling and a high level of active safety.

The Aveo U-VA's 1.2-liter petrol engine delivers 76 ps of peak power and healthy torque of 110 Nm. The Aveo U-VA delivers class-leading fuel efficiency with excellent drivability. This has been achieved by recalibrating the Engine Management system and gear ratio combination for Indian fuel, driving habits and traffic conditions.

The Aveo U-VA is designed to deliver an exciting driving experience to match the youthful and sporty design of the car and the active lifestyle of its users. This makes the Aveo U-VA an ideal city car that is both fun to drive and economical to run.
