Innovation targets scalable high speed item level tagging for Media and Entertainment Industry with Handleman

Great Falls, VA- epcSolutions, (epcsolutions.com) the leader in RFID software platforms and solutions, is proud to have been chosen as one of the Top 20 Innovators in the RFID industry by RFIDswitchboard. The results were announced in the Top 20 Innovators Magazine, which has been distributed world-wide. This honor focused on top companies who have leveraged RFID based application technologies to create customer success and solve business problems.

“We are proud that epcSolutions is included in this special publication,” said Andy Kowl, publisher of 20 Leading RFID Innovators and of RFIDswitchboard.com. “Working with company founder and CEO, Kevin Kail, reminds you where their innovative approach comes from.”

epcSolutions’ is the first to offer “The Internet of Things for Business” with their platform of products which offers solutions for the Global GS1 Standards, retailer compliance, [www.epcsolutions.com/rfidtagmanager](http://www.epcsolutions.com/rfidtagmanager), asset tracking [www.epcsolutions.com/fixedassetmanager](http://www.epcsolutions.com/fixedassetmanager) and item level tagging. epcSolutions has been working very closely with their partner, Handleman Company, [www.handleman.com](http://www.handleman.com) to develop an item level tagging solution. While researching and developing this solution, epcSolutions worked with Handleman to integrate into their Oracle system, and worked to be sure that the solution was scalable for high speed in-line tagging and high volume reading with a handheld reader.

“We are honored to have been chosen to receive this award for our vision and cutting edge solutions to today’s RFID centric business problems.” States Kevin Kail, CEO, epcSolutions.

### About epcSolutions

epcSolutions, Inc. is the leading provider of RFID compliance software to the Wal\*Mart and DoD supplier community. epcSolutions’ GS1Net3 platform suite implements the GS1 System, a series of standards designed to improve supply chain management. The GS1 System includes: BarCodes - Numbering and bar coding; eCom - EDI (Electronic Data Interchange); Global Data Synchronization Network (GDSN) - data synchronization; EPCglobal - RFID (Radio Frequency Identification). The “Any Asset, One Network” application platform allows users to manage all four asset types found in a typical business: Work in Process, Finished Goods/Inventory, Fixed Assets and People.
