

## GTG Welcomes New Architect Nora Garcia

Date: 04-10-2008 12:22 PM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [GTG Consultants, PC](#)

CHICAGO, IL – April 9, 2008 – GTG Consultants, PC today announced that Associate Architect Nora Garcia has joined the architectural and engineering consulting firm's West Coast office in San Francisco.

Initially, Garcia will work closely with company founder and principal George Wolodzko, but is expected to quickly assume management of her own portfolio of projects, helping GTG to expand its reach in the Western U.S. and the Pacific Rim.

"We are glad she has joined the other professionals on GTG's team helping to meet our ever increasing clients' specific needs," said Wolodzko. "Her experience in commercial real estate development and architecture, willingness to learn, ability to think outside the box, and her vibrancy led to her hire."

Garcia brings eight years of experience as project manager for a San Francisco based developer specializing in commercial development, and says she is eager to apply her expertise and professionalism in managing multiple projects as a consultant.

Prior to her employment at Village Properties/Spear Design Associates, Garcia served as a project coordinator and draftsman at MBH Architects in Alameda.

Garcia earned a BA in Architecture from California Polytechnic State University, in San Luis Obispo, and is currently pursuing licensure.
