Latest release of Comodo BackUp continues to build on its superior easy to use interface, data management, and auto-archive functions

Jersey City, NJ (April 23, 2008) - Comodo, a global leader in security solutions, announced today that its Comodo BackUp, a free solution that protects data from system crashes, accidental deletion, and corruption from viruses recently garnered the highest five star rating from GTDownload.com. Comodo BackUp provides full document backup, easier automated file duplication and recovery so users can protect their information and documents reliably. It is also one of the easiest ways for most users to maintain a regular process for file backup that overcomes many of the concerns users have about the perceived difficulty to implement regular backup processes for the PCs.

Regular system backups are a critical component of good PC maintenance. Yet, consumers often overlook backing up files because of perceived difficulty, cost, or both. Comodo BackUp incorporates new features designed to enable the safe and easy backup of critical data, suitable for home users and network administrators alike. Files can be saved to a variety of customer-selected media such as a local or network drives as well as FTP servers and CD/DVD rewriters. Key features of Comodo BackUp include:

- * Complete file and folder duplication to local / network drives, FTP servers and CD/DVD re-writers
- * Schedule backups to run automatically according to user defined timetable
- * File Synchronization - real time backups whereby files are copied as soon as they are saved
- * Intelligent incremental backups
- * Should the original files become damaged or lost, users can quickly recover them using Comodo BackUp's one touch 'restore' feature.
- * Advanced, rule-based filtering
- * E-mail reporting to mailing lists upon backup completion
- * Extensive reporting logs
- * Can run in User Specific or Windows Service mode
- * Zero learning curve - configure in minutes using an intuitive interface

According to GTDownload.com, "Comodo BackUp is the straightforward and powerful utility that allows users to quickly and easily create backup copies of critical files. Free of charge, its features include complete file and folder duplication to local/ network drives and FTP servers, intelligent incremental backups, e-mail reporting, extensive report logs, real time backups with 'synchronization' mode, advanced rule-based filtering, flexible scheduling of backups, space-saving archiving capabilities, and more."

This application is free to download and use and comes with a free, lifetime license. Users can download from
