

Al Farida Investments Selects Skoolee Tools for Horizon Private School

Date: 05-06-2008 04:46 PM CET

Category: [IT, New Media & Software](#)

Press release from: [White Mountain Technologies](#)

Abu Dhabi-based group, Al Farida Investments, has signed a formal agreement with White Mountain Technologies for Skoolee Tools School Management & Student Information Software.

Skoolee Tools will serve as the vanguard administration and communication system for Horizon Private School, set to open in Abu Dhabi in September 2008. The multilingual software, generally managed by a school's I.T. Department, is accessible over the Internet, a school's local area network or even a single computer.

Skoolee Tools is uniquely tailored for private, international and progressive public schools in the Middle East and North Africa. The system is available in Arabic, English and French to meet the administrative requirements of schools in the region.

Horizon Public School will use two types of Skoolee Tools modules. 'Essentials' include basic modules for agendas, assignments, communications, conduct, grading, performance and more. 'Add-Ons' offer advanced analytics and reporting, registration and fees, facility use, and services, including library, medical, transportation, and more.

White Mountain continually develops new modules. With Skoolee Scheduling Module, Horizon Public School will also be able to create conflict-free course schedules. In the next release of Skoolee Tools, White Mountain will also feature a yearbook publication module.

About Skoolee Tools

Skoolee is an evolving online initiative for the education sector in the Middle East and Africa. As a first step, Skoolee Tools management software assists multilingual international, private and progressive public schools in the Middle East and North Africa schools to operate more efficiently. It also brings together directors, principals, teachers, staff, students and parents for an even more dynamic and interactive community.

Skoolee Tools complements other White Mountain software products for the Arab and African education sector.

UniversiTools (University Tools) modules help universities and institutions of higher education manage academic year cycles and services: exam scheduling, course scheduling, course catalog creation, academic calendar creation, resource facilities allocation, donations, grants & scholarships, career center, and alumni relations.

White Mountain's Corporate Learning Management Systems (CLMS) help medium and large companies and organizations in the Middle East and Africa manage education and training needs and activities online.
