Press release from: [WinScribe](#)

Chicago, May 10, 2008 – WinScribe announced today that it has deployed its award-winning digital dictation, transcription, and workflow management solutions to Memphis based Semmes-Murphey Neurologic and Spine Institute. WinScribe's mobile functionality was a primary factor for the firm's decision to choose WinScribe.

“WinScribe's application for BlackBerry Smartphones was very attractive to our physicians,” says Chris Harris of Semmes-Murphey. “WinScribe for BlackBerry Smartphones gives our physicians the ability to dictate from anywhere utilizing hardware we already owned. In some cases, physicians are now able to carry a single device rather than juggle multiple devices.”

WinScribe's key objective in developing WinScribe for BlackBerry Smartphones was to make life easier for the mobile professional by combining the accessibility of all applications onto one device that is secure and easy to use. The latest release supports encryption of audio files stored on the device SD-Card. WinScribe is the first and only dictation provider offering this level of security at the device level.

WinScribe's sleek dictation application for BlackBerry Smartphones streamlines and simplifies the dictation process and speeds up work turnaround with its fully featured finger touch control, insert/over-write capability, secure voice and data transmission, speech recognition integration and online/offline functionality. Since the launch of the application in February of this year, WinScribe for BlackBerry Smartphones is being deployed in over 30 of the top legal firms internationally as well as a number of medical organizations.

About WinScribe

WinScribe is a world leading provider of digital dictation software supporting business requirements for digital dictation, transcription, voice recognition, and workflow management. Founded in 1989, WinScribe has offices in the USA, UK, New Zealand and Switzerland, with more than 100 sales partners in over 25 countries supporting more than 350,000 users worldwide.

The WinScribe solution is built on Microsoft architecture, to ensure easy integration and maintenance. WinScribe also supports a wide range of manufacturer-independent dictation devices and is scalable from small, single office locations up to large multinational corporations. WinScribe is fully customizable to meet the needs of a number of significant vertical markets including Legal, Law Enforcement, Healthcare, Transcription, Insurance and Government Sectors.

About Semmes-Murphey

Founded 95 years ago by Eustace Semmes, MD, and Francis Murphey, MD, Semmes-Murphey Neurologic & Spine Institute has been a leader in the development of technology and procedures that improve the quality of care for patients with neurological and spine disorders. This continuing leadership has made the Semmes-Murphey name instantly recognizable to physicians across the country and the world, many of whom refer their patients here for treatment.

The doctors of Semmes-Murphey Neurologic & Spine Institute specialize in neurosurgery, neurology, physical medicine and rehabilitation, pain management and neuropsychology. All of these fields of medicine deal with illnesses, injuries, and surgery related to the nervous system. The Institute, through its various hospital affiliations, has access to all of the most advanced diagnostic and treatment tools including magnetic imaging (MRI), interventional neuroradiology, nuclear medicine, Linac scalpel, Gamma Knife, and image-guided surgery.

About Rhodes, Lauck and Associates

Semmes-Murphey chose WinScribe Partner Rhodes, Lauck and Associates for WinScribe project implementation and support. Rhodes, Lauck, and Associates, Inc. sells, supports and services mission critical systems that include digital voice, transcription outsourcing, medical coding, print and data solutions. These solutions include integrated professional voice recognition systems, digital dictation for the Medical and legal markets, and a complete line of digital logger systems for 911, law security, court room systems, call centers and air traffic control systems. With corporate headquarters in Memphis, Tennessee, Rhodes, Lauck and Associates, Inc. provides sales and service to more than 5,000 active customers in the tri-state area of Tennessee, Mississippi, Arkansas, and Kentucky.
