Press release from: [TOPEX](#)

Agency: **TOPEX**

During CERF 2008 opening, TOPEX, a leading telecom equipment manufacturer and NGN solution provider, was successfully present in ORANGE stand as an equipment provider for its new “Business Kit” solution.

ORANGE Business Kit solution launched during CERF 2008, an innovative communication solution for large companies, is based on TOPEX Bytton equipment, a professional multitasking device that offers one voice line (telephone or exchange) connectivity and internet access for a local computer network. This solution will be promoted at Orange Romania level through its specialized sales channels for enterprise solutions.

This wireless device for voice and data services is compatible with HSDPA/3G/EDGE/GPRS mobile technologies and can be connected to WIMAX equipment. It serves also as a VPN Router with powerful Firewall, LAN Server and Video Surveillance Server.

The Business Kit offers Orange corporate customers a communication service quality guarantee, thereby removing the requirement for a backup provider, the visitors from CERF 2008 to the Orange stand having the opportunity to test-drive this service.

“We are delighted that this innovative service launched by Orange is based on our pivot direction for 2007, the Bytton router, and in this way we contribute to the development of the Romanian telecommunication market. This valuable partnership allows us to show once again that the company is focused to deliver efficient services by very skilled people, in fast conditions.”, declared Mr. Cristian Stefanescu, Business Development Manager Major Accounts Fixed & Mobile Operators for TOPEX.

During this event you can learn more about TOPEX products and solutions visiting booth 6095, in Hall 16-17.
