Press release from: [Dreamtech Press](#)

Delhi, India (May 9, 2008) - "Why to copy class notes (which may contain mistakes), when they are easily available in the form of a book," says Corporate Trainer and an independent consultant – Santosh Kumar K. His new book, "JDBC, Servlets and JSP Black Book", published by Dreamtech Press, is out for release today.

This book provides the "Web Developers" with a simple and consistent mechanism for extending the functionality of a Web Server for accessing existing business systems. This will be a unique book for self learning and getting expertization in Java database and web technologies such as JDBC, Servlet, JSP, JSTL and JSF. The book promises to be useful not only for self updating the readers but also for the readers who already know the concepts and want to get more in-depth knowledge about these topics.

On the book release, Ms Arti Pandey, Publisher- Dreamtech Press, added – "We understand, "Servlets" have become a popular choice for building interactive Web Applications, now-a-days. On that very note, we have planned to launch a book that presents the most sought after information in an easy to understand manner."

This title is yet one more promising addition to the "Black Book" series, a series supported and acclaimed by existing readers. Written by experienced professionals, "Black Books" from Dreamtech Press provide immediate solutions to global programming and administrative challenges, helping readers – professionals and novices, to complete specific tasks, especially critical ones that are not well documented in other books.

The author starts his book by acknowledging the key persons including Mr. Rudraksh Batra (Project Manager – Kogent Solutions Inc.) and his team members for their cooperation in reviewing & editing the content of the book. He also expresses his words-of-thanks for providing the additional content wherever required.

"The book provides as much information on Servlet and JSP as can fit between the covers. Strikingly, each chapter provides running Web Applications to have a better understanding of multiple concepts", revealed Rudraksh.

The book will be available for sale with selected book distributors and sellers this week.

About the Author:

Santosh has conducted numerous training programs for the corporate sectors involved in enterprise application developments on J2EE technologies and other frameworks like Struts, JSF Spring and Hibernate. He has been teaching Java since 2001 and is currently associated with Naresh I Technologies, a division imparting specialized training in Java.
