

bmcm - The manufacturer of measurement technology announces positive development contrary to the trend

Date: 05-21-2008 10:14 PM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [BMC Messsysteme GmbH \(bmcm\)](#)

Maisach/Munich/Germany. With great success BMC Messsysteme GmbH (bmcm) presented itself at SENSOR + TEST 2008, the leading measurement fair. Their products in the range of industrial PC data acquisition and embedded PC systems aroused much interest in the trade visitors.

In spite of the slight drop in the number of visitors during SENSOR + TEST 2008 from May 6 to 8, 2008 in Nuremberg there were large crowds at the booth of BMC Messsysteme GmbH.

The exceptionally informative booth design caused many to stop abruptly. On large banners the concept of the measuring chain was introduced whose components are completely available at bmcm and compatible to each other.

In peak times the professional visitors even accepted waiting times to experience the latest developments in the field of data acquisition systems, amplifiers systems and embedded PC technology.

Especially the following bmcm products were in the spotlight:

- the latest USB data acquisition system USB-AD16f with an unbeatable price-performance ratio
(--> www.bmcm.de/us/pr-usb-ad16f.html)

- the individual possibilities to equip the 19" AMS amplifier measurement systems with integrated 5B technology and a LAN or USB data acquisition system
(--> www.bmcm.de/us/pr-ams42.html)

- last but not least: the extremely easy and intuitive operating of the professional measuring software NextView 4 for data acquisition and analysis realizing the most different measurement applications directly without programming
(--> www.nextview.de)

The trade visitors were especially surprised by the reasonable prices of BMC Messsysteme GmbH which are something to be proud of in the sector of measurement technology.

Which other manufacturer offers a measurement device such as the USB-AD16f providing 16 analog inputs with 16 bit at 250kHz sampling rate and many other features for just 399.- EUR (net price)?

Directly from the manufacturer and with the quality mark "Made in Germany" the complete measuring chain is available at bmcm. Further information about the USB-AD16f and other products of BMC Messsysteme GmbH is provided at:

*** About BMC Messsysteme GmbH (bmcm) ***

BMC Messsysteme GmbH was founded in 1994 as an independent corporation with headquarters in Maisach, app. 30 km west of Munich. Until today this autonomy could be kept, so that any affiliation to a business group never existed and is not intended for the future. bmcm is one of the only German companies that completely develops and produces all products in Germany, which means quality "made in Germany" at an excellent price/performance ratio.

BMC Messsysteme GmbH serves two business areas:

* Measuring components and PC measurement technology *

This comprises a wide range of connection systems, measuring amplifiers, data acquisition systems, data loggers and the appropriate software.

www.bmcm.de/us/prgr-products.html

* D2M (Design to Manufacturing) and OEM products *

BMC Messsysteme GmbH develops and produces electronic components according to customer specifications.

www.bmcm.de/us/co-d2m.html

You will receive high-quality products manufactured already since the beginning of 2006 according to the RoHS directive. Of course, the corresponding documentation and CE test is always included.

A German documentation is obligatory for us, as well as an English description to be available to our international customers.
