

## **Histological characteristics of cutaneous and thyroid mast cell populations in male rats exposed to power-frequency electromagnetic fields**

Date: 11-10-2005 08:11 AM CET

Category: [Science & Education](#)

Press release from: [Buergerwelle Germany \(incorporated society\)](#)

In summary, it turned out that the numerical and volume densities of intact type A mast cells in the thyroid of the exposed group of rats were significantly higher as compared to the control (p
