

GARDENA decides on abbino: Process automation by intelligent communication

Date: 06-10-2008 05:35 PM CET

Category: [IT, New Media & Software](#)

Press release from: [abbino GmbH](#)

GARDENA is the leading European producer of gardening tools and system components. The company has now authorized abbino GmbH from Dortmund, Germany, with the company-wide automation of stocks- and ordering processes within the supply chain. The abbino software is implemented as a solution.

For GARDENA this means: a flexible and innovative connection of various operational procedures with its suppliers. By implementing the modules abbino eOrdering, abbino SMI, abbino SafetyStock, abbino Forecast, and abbino Statistics not only cost and stocks are lowered; but GARDENA as well as its suppliers also saves time. Since, besides operational procedures, the data transfer is realized in a faster, safer, and easier way.

Helmut Brosch „Project Manager of Supply Chain Projects GARDENA“: „We have chosen abbino because the company and its employees emanate competence and reliability, the abbino supplier portal is employed successfully at relevant users and well accepted by their suppliers. “
