

Brigade Electronics Introduces Highly Resilient Waterproof CCTV camera systems

Date: 07-04-2008 01:18 PM CET

Category: [Logistics & Transport](#)

Press release from: [Brigade Electronics PLC](#)

The VB790C and BE890C cameras have a supreme IP rating of 69K are dust tight and extremely waterproof. The cameras can be immersed in water for long periods of time, are resilient to high pressure from steam and jet cleaners: making vehicles more hygienic and therefore safer.

The VB790C and the BE890C are the ideal solution for industries that require their vehicles to be pressure washed such as; food processing, the grocery trade, garbage trucks, and for vehicles that get particularly dirty like mining and quarry.

Both cameras feature infrared LEDs for ultra-low light performance and are easy to mount for a secure and compact fitment. The cameras work well in extreme weather conditions such as; excessive humidity, rain and snow, in temperatures as low as -20°C and as high as 70°C.

All of Brigade's products are HALT tested (Highly Accelerated Life Testing) for ruggedness and durability. The VB790C has a warranty of 2 years and the BE890C has a long life warranty of 3 years for extra peace of mind.

Brigade are pioneers in reversing safety, providing all round vision devices for over 30 years on commercial vehicle and mobile plant machinery. Brigade knows what it takes to make robust CCTV systems that deliver high quality performance and reliability in increasingly demanding environments.

Brigade Electronics plc was established in 1976 and is market leader in reversing safety systems. It is the only company in the world to provide a complete range of reversing safety systems and with its new product introductions extend safety to all-round visibility, security and communication. The company's reputation is built upon the quality and reliability of both its products and its service and support.
