The Next Generation Test Management System.

Sunnyvale, CA. July 17th, 2008— Zephyr has released the latest version of its next generation test management system. Version 1.1 contains many enhancements driven directly from customer feedback.

Here's what you'll find in Zephyr v1.1:

- Ability to customize Database and Server port numbers
- Performance and memory enhancements to speed up loading of Dashboards and Metrics
- Enhanced detailed and Contextual Help
- Repository Setup: enhanced drag-n-drop functionality, grid sorting, layouts, and defaults assignment
- Testcase Creation: reliability enhancements, better handling of imported testcases and other functions
- Testcase Execution: addition of comments field, color-coded status fields, update multiple testcases at once, sorted columns
- Testcase EAS: support for long cycle names, current execution status displayed
- Increased text fields areas across the board
- Multi-selection turned on in all lists
- Ability to export multiple testcases with detailed test steps
- Better formatted testcases and metrics on export
- Color-coded test execution metrics

Zephyr v1.1 also has a comprehensive User Guide with detailed How-Tos and step-to-step information on all the features of the product. It is ready for use and can be downloaded anytime by signing up at www.getzephyr.com. Due to overwhelming demand, Zephyr has also extended the 3 free user license promotion.
