Press release from: [Heraeus Noblelight](#)

Heraeus Noblelight will be represented at IWA Vienna 2008 and AQUATECH in • Amsterdam

- UV treatment – a reliable and environmentally friendly method
- Product innovation will be launched at AQUATECH

Heraeus Noblelight, the manufacturer of special light sources, will be represented at the forthcoming events of the water industry – at IWA Vienna 2008 and AQUATECH 2008 in Amsterdam.

The IWA World Water - Congress and Exhibition – takes place in Vienna, September 8-11, 2008. AQUATECH, the world's leading trade exhibition on process, drinking and waste water technology, will be in Amsterdam, September 30 to October 3, 2008.

Heraeus Noblelight will be showing UV lamps which are used for drinking water disinfection in waterworks, for wastewater treatment in sewage treatment plants and for the treatment of industrial process water. These include low pressure UVC lamps, compact, high power medium pressure UV lamps and Longlife amalgam lamps.

An innovative and powerful UV Amalgam Lamp will be launched at AQUATECH in Amsterdam.

In addition to the conventional processes for cleaning water – such as the use of chemicals like chlorine and ozone or filtration systems – the importance of ultraviolet light as a reliable, environmentally friendly and economically viable alternative is ever increasing.

Since its development of UV medium pressure technology in 1904, Heraeus Noblelight can look back to 100 years of experience in the development, production and application of UV lamps. Through innovations such as Longlife technology, Heraeus continues to set milestones in the field of UV lamps. Heraeus Noblelight is an original equipment supplier and the partner of choice for many systems builders involved in the disinfection of water, air and surfaces, as well as for manufacturers of systems for photo-chemistry and photo-oxidization.

Heraeus Noblelight at IWA Vienna: Stand 405

Heraeus Noblelight at AQUATECH: Stand 03.404, West Hall #3.
