Press release from: [IDAutomation.com, Inc](#)

(Tampa, FL.) IDAutomation.com, Inc. announces the release of their Barcode Recognition Image Decoder SDK, which allows for easy scanning of barcodes in .NET Framework applications.

The package reads multiple barcode types from a single DLL that is 100% managed code, strong named and digitally signed. Supported barcode types include Code-39, Code-128, GS1-128, Code-93, Code-11, Interleaved 2 of 5, Codabar, MSI, UPC-A and EAN-13. The demo download includes a source code example for Visual Basic .NET and tutorials for VB.NET and C#.

A distributable royalty-free small company Developer License starts at \$395. More information about this new product and to download a demo can be found at www.idautomation.com/barcode-recognition/. IDAutomation also provides barcode fonts and barcode components and has been marketing ID automation products since 1996 and is privately held. For more information, visit their website at www.idautomation.com/.
