25 years of Shuttle: New XPC P2 3500S delivers maximum performance

Shuttle Inc., the market leader in the mini PC segment and manufacturer of multi form factor solutions, is kicking off its 25th anniversary with a powerful complete system at a particularly attractive price. Only limited numbers of the Shuttle XPC P2 3500S are being produced for this occasion.

"The production team of complete mini PC systems have really achieved outstanding work and created a fully-featured mini PC that will be difficult to beat when it comes to value for money," said Tom Seiffert, Head of Marketing & PR, Shuttle Computer Handels GmbH.

Its setup of features impresses with an Intel Core 2 Duo E8400 processor, ATI Radeon HD 4850 graphics card, 4 GB DDR2-800 memory, 1 TB SATA2 hard disk, DVD writer and with Windows Vista Home Premium operating system pre-installed. The 24 month Pick-up and Return Service in case of a warranty claim rounds off the offer. The aluminium mini PC is only 32.5 cm deep, 22 cm wide and 21 cm high and can therefore be accommodated nearly everywhere.

The Shuttle XPC P2 3500S is targeted at users looking for high performance in smallest places at an attractive price tag. And so even the most demanding 3D games at home and complex professional applications will not pose any problems.

This complete system is based on the XPC Barebones from the P2 model range which forms the basis for Shuttle's fastest mini PCs using high performance components and sophisticated cooling solutions.

The Shuttle XPC P2 3500S is available immediately from Shuttle Systems Partners across Europe or can be ordered directly through the Shuttle Systems Configurator on the Shuttle website. Shuttle's recommended price is EUR 755 (without VAT).

Shuttle Inc, founded in Taiwan in 1983, is specialised in development and production of innovative mini PCs. The joint-stock company is represented worldwide by a network of branch offices in Germany, the US and Japan. Since 2001 the attractive cube-shaped PCs have conquered nearly any field of application and have become the core business of the company headquartered in Taipei / Taiwan. Widely acclaimed by customers and press across the globe, Shuttle founds its success on effective management and long-term experience in making mainboards of highest quality standards. Since years Shuttle's mini PC barebones and fully-configured systems are the first choice of many system integrators, VARs, OEMs and ODMs banking on the high reliability and build quality. With appealing mini PC solutions Shuttle meets the requirements of consumers excellently and seeks to provide further user-friendly solutions of consumer electronics for the digital home environment.
