

## White Mountain Introduces New UniversiTools Software Modules

Date: 09-02-2008 03:05 PM CET

Category: [IT, New Media & Software](#)

Press release from: [White Mountain Technologies](#)

White Mountain Technologies has expanded its line of UniversiTools scheduling and management software, as college and university administrators gear up for the 2008-2009 academic year.

White Mountain has released Alumni Connection, Class Scheduler, and Common Time Locator modules for the higher education sector in the Middle East and North Africa.

According to Ghassan J. Abboud, Managing Director, White Mountain focuses on real needs universities in the region face in scheduling and managing relations with students and alumni. "We intend to cover intricate and dispersed requirements from which vendors of integrated student information systems often tend to shy away."

Alumni Connection, designed for university alumni offices or associations, facilitates interaction, support and fundraising with graduates.

With Class Scheduler, university registrars automatically generate schedules that allocate classes to rooms, taking into consideration an array of variables and scheduling preferences.

Common Time Locator, which allows for alternative scheduling of extra sessions or time changes, finds optimum common free periods among all students.

The company's first scheduling tool, UniversiTools Exam Scheduler, obtains 100% conflict-free exam timetables and reduces back-to-back exams for students on the same day. With this tool, university registrars take into account room capacity, professor preferences, and other constraints to optimize all variables related to the exam period.

For a 15-minute presentation about UniversiTools university software modules, contact White Mountain Technologies. Or submit the online request form at [www.UniversiTools.com](http://www.UniversiTools.com).

UniversiTools (or University Tools) software modules help universities and institutions of higher education manage academic year cycles and services: class scheduler module, course catalog module, exam scheduler module, academic calendar year creator module, resource facilities allocation module, grants & scholarships module, career center module, and alumni module.

UniversiTools complements other education administration software from White Mountain. Skoolee Tools school management software is designed specifically for multilingual international, private and progressive public schools in the Middle East and North Africa.

BaseCamp LMS (learning management systems) help medium to large companies and organizations manage their executive and professional education and training requirements.
