Press release from: [Nare](#)

UK chandlery website nare .co.uk have just announced that August was their busiest month ever. The company, which specialises in chandlery, sailing clothing and marine electronics, was launched in January 2008 and has made a rapid impact on the UK boating market with a wide range of brands (including Gill, Lowrance, XM Yachting, Northstar and Ocean Safety) at competitive prices.

Martin Dinham of Nare says that “...in August we had in excess of 10,000 visitors to our website, a figure that absolutely delights our team. We're particularly pleased with the growth of the site given the terrible UK summer, which may help explain why we sold record quantities of oilskins in August !”

Based in modern warehouse premises in Cornwall, Nare aims to be the UKs leading internet only sailing equipment retailer by offering a broad range of quality products quickly, cheaply and efficiently. Dinham comments that “we have made a significant investment in a secure and easy to use website as well as in modern warehousing and systems. Combined with the knowledge of our team, I think this makes the business ideally positioned to benefit from the increasing desire of boatowners to buy product over the internet.”

Best selling products at Nare over August have included the XM Yachting Offshore Suit at just £149.99, the remarkable Reliefband Anti Seasickness Device at less than £90 and the stylish Gill Crew jacket amongst others.

www.nare.co.uk is a rapidly expanding UK internet based retailer of chandlery, clothing and marine electronics. With brands including Lowrance, Gill, Northstar, Ocean Safety and Helly Hansen amongst others, Nare offers a wide range of products via a class leading, easy to use and secure website platform backed up by a knowledgeable and experienced staff of specialists.
