Press release from: [Deacom, Inc.](#)

WAYNE, PA - September 3, 2008 - At this year's Building Component Manufacturers Conference (BCMC), Deacom, Inc., producer of the DEACOM Integrated Accounting and Enterprise Resource Planning (ERP) Software System, will exhibit how manufacturers can gain a competitive advantage in today's challenging marketplace by building business efficiencies through technology. The annual event, scheduled for Oct. 1-3 in Denver, CO, is the premier networking and showcasing opportunity for the building component industry.

Through a variety of educational sessions, plant tours, roundtable discussions, and exhibitions, BCMC offers an in-depth look at the newest products and services available to the trade. The DEACOM ERP Software System, which integrates engineering design links, production scheduling, labor tracking, inventory control, purchasing, sales order entry, and accounting in a single system, will be the only fully integrated business software on display at BCMC.

"To succeed in this tough economy, manufacturers must find ways to increase efficiencies," says Jay Deakins, President of Deacom. "Investing in integrated ERP software, because it manages every aspect of a business, can deliver tremendous savings in terms of manufacturing productivity."

BCMC attendees are invited to visit Deacom at booth #4965 for a personal demonstration of the DEACOM System. Visit www.bcmshow.com to register for BCMC 2008.

To learn more about the DEACOM Integrated Accounting and ERP Software System or to schedule an online demonstration, call 610-971-2278 ext. 15 or visit www.deacom.net.
