Press release from: [SkyRFID Inc.](#)

Cambridge, Canada, September 08, 2008 - SkyRFID announces their new UHF Gen 2 tag that uses the latest recently announced third generation of IC's. This new tag is providing an enhanced distance of over 25% from the earlier generation 2 IC inlays reaching over 9 meters (over 30 feet). The new SkyRFID UHF Gen 2 tag is designed for rough and harsh service environments where you need an extended read distance, may encounter high temperatures of up to 125°C or 257°F and wet environments. The tag is made of clear UV stabilized polycarbonate and has a label surface area for a barcode and human readable should it be required. Sizing on the tag is 115.03 mm x 52.8 mm x 15.8 mm.

This tag can be riveted, bolted on or attached with epoxy or even double back adhesive tape. These tags are very attractively priced making them ideal for applications such as asset management, supply chain management, manufacturing and more. Since the tag has been designed to withstand water depths of 42 meters there are many potential marine or oil and gas applications for this new tag.

Options include custom encoding on the EPC numbers for ease of asset tracking plus you can even get an optional steel ball insert for detection by food processing equipment.

### About SkyRFID Inc.

SkyRFID is a privately held Canadian company specializing in Automated Data Collection (ADC) solutions that use Radio Frequency Identification (RFID) technology. SkyRFID has over 20 years of experience in ADC and provides customers with everything from a single consulting engagement to a complete turnkey global solution. SkyRFID personnel have implemented solutions in all of the Americas, Europe and other countries with great success. SkyRFID provides solutions in Low Frequency (LF), High Frequency (HF), Ultra High Frequency (UHF) and Microwave (SHF) RFID technologies and has considerable expertise in Asset Management, Access Control, Document Management, Library Systems, Field Service, Manufacturing, Supply Chain, Warehousing and Distribution, Event Management, Fleet Maintenance, and more.
