Dallas, TX. (September 11, 2008) - The Dallas-Fort Worth Minority Business Development Council (DFWMBDC) granted ISHIR, Inc., through the certification and compliance procedures of the Texas Procurement and Support Services (TPSS), as a Historically Underutilized Business (HUB). To be approved for HUB certification, at least 51% of a profit-making company, sole proprietorship or joint venture's equitable securities or stocks must be owned and managed by minorities. Minority members include those who are Black, Asian, Hispanic, Native American or American women from ethnic backgrounds not previously listed.

"We are honored to have been given this certification and have hopes to increase business opportunities with other minority enterprises," Rishi Khanna, managing director, said. "The HUB certificate will help elevate future business relationships within Texas."

HUB certifications are valid for 4 years, given that the business continues to meet eligibility requirements.

ISHIR is a diversified offshore IT services provider. The company's competencies lie in setting up dedicated offshore software development teams for outsourced product development, game development, application maintenance and independent software testing with a local project management team. The eight-year-old company uses a proven project management and mature development methodology. ISHIR is a CMMI Level 3 Company, Microsoft Gold Certified Partner and Intel Software Partner. ISHIR corporate website can be accessed at www.ishir.com.
