Managed alternative roaming service provider to offer differentiated mobile VoIP and low-cost roaming services powered by Blueslice

Montreal, Canada- September 29, 2008: Blueslice Networks announced today that MiNO Wireless has purchased the Blueslice ngHLR 3000™ with enhanced features. MiNO Wireless plans to take advantage of the Multi-IMSI and VoIP technologies offered by the ngHLR 3000™ to expand their solution internationally.

With alternatives to roaming growing extensively, MiNO Wireless is offering a white-label managed service for operators to recoup lost revenues. Blueslice's next-generation Home Location Register will enable MiNO Wireless to develop enhanced services to create and deploy customized differentiated services. These services include a state-of-the-art, low-cost, and easy-to-use roaming solution in which a subscriber can have multiple "virtual" phone numbers and identities in different networks. The net benefit for the budget traveler is attractive rates that are notably better than the dreaded traditional roaming fees.

"After careful consideration of competing platforms, we selected Blueslice's next generation HLR to be the foundation of our managed service," said Douglas Cheline, Vice President of Engineering and Operations for MiNO Wireless. "The ability to map multiple GSM and VoIP identities to a single user profile enables us to offer a unique service to our customer operators."

"We are very impressed by MiNO's innovative business model and their go-to-market strategy," commented Frederic Bastien, VP, Product Line Management, for Blueslice Networks. "We felt MiNO was a great fit with Blueslice and expect to see significant growth from them."

About MiNO Wireless (www.minowireless.com)

MiNO Wireless is a leading provider of managed alternative roaming services that enable mobile operators to capture new incremental revenue from the millions of minutes typically lost while subscribers travel. Through a seamless wireless network provided by MiNO's white label partnerships, travelers using the MiNO service enjoy a superior user experience. Travelers may use their mobile phones from wherever they are to call anywhere in the world at attractive rates. MiNO Wireless was founded in 2004 and is headquartered in Santa Clara, CA (USA).

About Blueslice (www.blueslice.com)

Blueslice Networks is the leading provider of subscriber management solutions for the Mobile, VoIP, FMC, and M2M markets. Blueslice solutions allow mobile service providers to control their principal asset, their subscriber base, while delivering innovative and differentiated services and significantly reducing operational costs. Now, end-users can access coherent communication services seamlessly over any type of access with a single subscription and set of preferences. The carrier-grade, open standard Converged Subscriber Platform 3000™ is the only converged ngHLR/AuC, HSS, SIP Application Server, and AAA Server, which, together, enable universal mobility across all access networks.

Blueslice delivers solutions to the world's leading mobile service providers including wireless carriers, MVNOs, VoIP providers, and alternate carriers.
