Press release from: [Gecad Technologies](#)

Bucharest, Romania, October 8, 2008 - AXIGEN ([axigen.com](http://axigen.com)), the professional messaging solution vendor, announces today the commercial release of version 6.2 of the AXIGEN Mail Server featuring Commtouch's real time antispam protection and many other important security and delegated administration functionalities.

AXIGEN Mail Server version 6.2 comes with new and improved performance reporting, advanced delegation options, Web Mail user options for increased productivity, and a higher level of security.

“Aiming to maintain our development focus on Service Providers, this new version of the AXIGEN Mail Server is designed to support SPs in their efforts to provide complex and efficient services to business customers. The new security features, the real time performance reports and the increased control over the smallest details of email communication will help them build a high-end range of Software as a Service (SaaS) offerings for the corporate client segment,” said Oana Bornaz, AXIGEN CEO.

Winner of the ServerWatch 2007 Product Excellence Award for the Communications Server category, the AXIGEN Mail Server also runs on several Linux and BSD distributions, on Solaris, on Windows operating systems, on PowerPC and SPARC architectures and is becoming the messaging solution of choice for a growing number of service providers and enterprises worldwide.

### About AXIGEN

Established in 2001, Gecad Technologies SA, member of the GECAD Group, is the vendor of AXIGEN, a messaging solution for professionals that ensures an efficient and secure worldwide communication environment and business growth for both service providers and companies of all sizes.
