

## CeBIT 2006: link-lab present adaptive eLearning Content Management System

Date: 03-06-2006 10:57 AM CET

Category: [IT, New Media & Software](#)

Press release from: [link-lab](#)

Berlin, Germany, March 6, 2006 - link-lab introduces its Content Management System especially designed for eLearning at CeBIT hall 9, booth B39. On the basis of standards, i.e. IEEE LOM eLearning Objects it allows easy authoring and dynamic presentation of teaching modules. Taking the advantages of XML and the power of semantic web technologies the software makes possible to present and navigate on mobile devices. In addition the system provides you in particular with:

- \* Variable structurable, reusable information cells
- \* Instructional Designer to define instruction paths
- \* XML data pool with RDF support
- \* Context sensitive web authoring
- \* Support of mathematical formulas
- \* Adaptive management of interactions using semantic linking
- \* Self exploring semantical learning networks.
