Press release from: [Shuttle Computer Handels GmbH](#)

Picture and sound playback in high-definition quality over HDMI interface

Shuttle Inc., the market leader in the Mini-PC sector and manufacturer of Multi-Form-Factor solutions extends its portfolio with a new compact entertainment artist specifically designed to play back high-resolution Blu-ray media. The Shuttle XPC H7 7800H complete Mini-PC system is easy to use, stands for high processing power and space for expansion.

The Windows Vista based complete system includes a Blu-ray Combo drive, a card reader, hybrid TV tuner card, WLAN and a remote control. Based on the Shuttle XPC Barebone SN78SH7, this attractive Mini-PC solution barely measures 32.5 x 20.8 x 18.9 cm (DWH).

Users that want even higher performance than the built-in NVIDIA GeForce 8200 GPU already provides, can also equip the free PCI-Express X16 slot with an even larger graphics card. The heatpipe cooling system ensures the system runs quietly at maximum stability.

The very intuitively designed media centre interface of the pre-installed Windows Vista operating system is very easy to read on a television screen. Operation with the enclosed remote control is quick to learn and means this Shuttle Mini-PC can be instantly accessed from the sofa.

Technical specifications:

- * Mini-PC Complete System is based on: Shuttle XPC Barebone SN78SH7
- * Processor: AMD Athlon X2 6000+
- * Memory: 2x 1GB DDR2-800
- * Hard disk: 500GB, Serial-ATAII
- * Wireless Communication: Wireless LAN
- * Optical Drive: Blu-ray Combo
- * TV Tuner: DVB-T/Analog Hybrid (incl. remote control)
- * Other Drives: 25-in-1 Card-Reader
- * Operating System: Windows Vista Home Premium

The Shuttle XPC H7 7800H complete system is available immediately from Shuttle specialist retailers or can be ordered via the Shuttle Systems Configurator on the Shuttle website. Shuttle's recommended retail price is EUR 915 (ex VAT).

Shuttle XPC H7 7800H

Shuttle Inc, founded in Taiwan in 1983, is specialised in development and production of innovative mini PCs. The joint-stock company is represented worldwide by a network of branch offices in Germany, the US and Japan. Since 2001 the attractive cube-shaped PCs have conquered nearly any field of application and have become the core business of the company headquartered in Taipei / Taiwan. Widely acclaimed by customers and press across the globe, Shuttle founds its success on effective management and long-term experience in making mainboards of highest quality standards. Since years Shuttle's mini PC barebones and fully-configured systems are the first choice of many system integrators, VARs, OEMs and ODMs banking on the high reliability and build quality. With appealing mini PC solutions Shuttle meets the requirements of consumers excellently and seeks to provide further user-friendly solutions of consumer electronics for the digital home environment.
