

New UHF GEN 2 RFID Inlay Leather Executive Key Holder from SkyRFID Inc.

Date: 11-18-2008 01:04 PM CET

Category: [IT, New Media & Software](#)

Press release from: [SkyRFID Inc.](#)

SkyRFID Inc. just announced the availability of their new Gen 2 UHF RFID inlay Executive Key Holder that can be used for security access control and other UHF solutions. Made of high quality chrome steel and luxurious brown leather, this new key holder comes complete with a well built spring loaded swivel that allows clients to keep their keys secure while providing hands free access to UHF equipped solutions.

The RFID Key Holder provides over 2 meters (6 foot) read distance and is perfect for executives and upscale communities that are using or want to use RFID for access control, managing buildings, rooms, cabinets and other areas that need to be secured for safety reasons with limited privilege access.

This modern key holder measures 125 mm x 27 mm x 4 mm thick (5 inches x 1 inch x ¼ inch) on the chrome swivel and will provide years of service while being discrete with its Gen 2 inlay being hidden under the brown leather.

About SkyRFID Inc.

SkyRFID is a privately held Canadian company specializing in Automated Data Collection (ADC) solutions that use Radio Frequency Identification (RFID) technology. SkyRFID has over 20 years of experience in ADC and provides customers with everything from a single consulting engagement to a complete turnkey global solution. SkyRFID personnel have implemented solutions in all of the Americas, Europe and other countries with great success. SkyRFID provides solutions in Low Frequency (LF), High Frequency (HF), Ultra High Frequency (UHF) and Microwave (SHF) RFID technologies and has considerable expertise in Asset Management, Access Control, Document Management, Library Systems, Field Service, Manufacturing, Parking Management, Supply Chain, Warehousing and Distribution, Event Management, Fleet Maintenance, and Custom Tags.
