

Worlds Only Glaucoma Eye Test Through Eyelid Presented at MEDICA 2008

Date: 11-27-2008 09:38 AM CET

Category: [Health & Medicine](#)

Press release from: [BiCOM Inc.](#)

Unique through the eyelid Tonometer Diaton was successfully showcased at MEDICA 2008 - 40th World Forum of Medicine International Trade Fair with Congress, Dusseldorf, Germany. This year's conference featured the highest number of events in history of the conference with 4,313 exhibitors participating. 137,000 registered visitors attended the conference; allowing BiCOM Inc. to introduce Tonometer Diaton to the masses. MEDICA 2008 was an opportunity to obtain free training and to learn of the proven benefits of Diaton (transpalpebral) tonometry.

MEDICA 2008 presented new products, services and processes for use in doctors' surgeries and hospitals. With unique Tonometer Diaton, BiCOM is challenging Glaucoma. The "sneak thief of sight", it carries an increasing threat of preventable blindness worldwide. Diaton allows for screenings without the use of anesthetic drops and most importantly, no contact with the cornea. This makes screening easier than ever before, especially for children and seniors. Tonometer Diaton measures intraocular pressure (IOP) through the upper eyelid, over sclera, which in turn does not require correction for corneal thickness and reduces possibilities of infection.

Mr. Roman Iospa, CEO, BiCOM Inc. commented "MEDICA 2008 has allowed international exposure for our unique medical device. After following up with the people we have met, we will defiantly be launching Diaton in additional countries."

Portability and simplicity make Tonometer Diaton ideal for a wide range of uses: mass screening of the population, at the patient's bedside, in geriatric homes, in children hospitals, for the military and for home use.

Diaton Tonometer is intended for use by Inpatient & Outpatient Clinics such as Hospitals, Emergency Rooms, Nursing & Elderly Homes, General & Specialty Practitioners as well as Ophthalmologists and Optometrists.

Besides determining the potential for glaucoma onset, Diaton tonometer vs. other tonometers, Diaton can be used repeatedly during the day with no effect on the eye.

BiCOM Inc. covers the full scope of customer service, which involves client training, follow ups, hotline support, sales support, etc. To get more information on the device or to make a purchase, visit the official website - www.TonometerDiaton.com, or call BiCOM at the toll free number 1-877-diatons (877.342.8667).

BiCOM is a Global Master Dealer of medical devices representing Diaton internationally.
