Cabinet / speaker manufacturers such as Berhinger, Mackie, and EAW routinely change driver suppliers and speaker suppliers during manufacturing and retain the same cabinet model number

This means that if you have a Mackie SRM450 or a Gemini GX400 cabinet, it does not guarantee that it carries a P Audio BMD-450 driver and a P Audio BMD450-8 diaphragm. We highly recommend that you REMOVE AND IDENTIFY YOUR DIAPHRAGM & DRIVER BEFORE ORDERING.

This is a PARTIAL list of some of the models that this diaphragm is used in:
