

## **EUROPEAN ENQUIRY ON THE BIOLOGICAL SYMPTOMS EXPERIENCED by NEIGHBOURS of RELAY ANTENNAS for MOBILE TELEPHONES**

Date: 12-02-2005 06:34 PM CET

Category: [Media & Telecommunications](#)

Press release from: [Buergerwelle Germany \(incorporated society\)](#)

The goal of this new Research Questionnaire is to garner for 2005 and 2006 the maximum amount of new data and statistics in the face of the unprecedented growth of mobile relay antennas for Mobile Telephones (MT) resulting from the operators bringing into operation in the last few months new technologies (EDGE, 3G /UMTS, etc. . .).

This increased density of the network of relay stations for MT generates a very strong increase in “Electrosmog” (the whole set of ambient ElectroMagnetic Fields). This latest development is now taking the proportion of masts to an even more worrying level for our health, notably by the generalization of hyper frequency radiation from microwaves. The absence of objective information generates a total lack of understanding of the risks incurred by people who live near the relay antennas. Many studies show changes in electroencephalograms, associated with cerebral malfunction and put into question the role of ElectroMagnetic Fields (EMF) from the MT relay antennas in the outbreak of neurovegetative troubles such as headaches, abnormal fatigue, disturbance of sleep etc. . . from where comes the all new expression of recent years: “People Are Tired”.

This anonymous questionnaire if you want to complete it, is easy to complete. It is essential that it is widely broadcast in France and in Europe so that it might be credible. After data processing of the responses to the questionnaire, we will put the statistics back in the hands of the scientists for final analysis.
