

Leading Fort Myers Web Design Firm Experiences Record Growth in 2008

Date: 01-05-2009 01:12 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Brian Joseph Studios LLC](#)

Brian Joseph Studios LLC has announced that 2008 was the company's most successful year to date in their four year history with growth of over 600% in areas such as staff, office locations and revenue generated.

With headquarters in Fort Myers, Florida, Brian Joseph Studios LLC expanded its operations internationally in 2008, opening offices in both Ireland and England. "It has been a wonderful year for the company, and all involved. We have enjoyed working with all types of business owners and marketing teams. We acquired a client in Hawaii and a few more in England and Ireland, so we are excited about the expansion into these markets outside of Southwest Florida" says Mr. Brian Yerkes, Owner and Creative Director of Brian Joseph Studios LLC.

The staff team at Brian Joseph Studios has now grown to fifteen employees located in several countries around the world, all working remotely yet closely together on each project. This growth has allowed Brian Yerkes to further the brand and business development of Brian Joseph Studios outside of Fort Myers and Naples Florida, and this has led to a 600% increase in the overall revenue generated in 2008.

Brian Joseph Studios LLC is now considered Fort Myers web design and Naples web design experts and there is no sign of them stopping or easing up. Recent clients acquired include the Fort Myers Beach Chamber of Commerce and Southwest Florida's leading hotel & resort management company, Sunstream Hotels & Resorts.

Yerkes looks forward to the year ahead and says "2009 looks set to be an extremely interesting year for social media and online marketing, as personal and human interaction becomes even more important through the vast array of online channels available, and companies of all sizes are no longer going to be asking "why" they need to interact socially online with their market; they will be asking "how".
