Press release from: [Plunet](#)

With immediate effect, EnssnerZeitgeist GmbH, the agency for translation, documentation and advertising, is transferring its project management systems, which are certified according to DIN EN ISO 9001:2000, to Plunet BusinessManager. Against the background of increasingly international structures, the growing diversification of incoming projects and the implementation of international quality standards, the decision was taken at the company's headquarters in Schweinfurt to introduce Plunet BusinessManager as the company's central project and workflow management platform. For CEO Christian Enssner, grandson of the company's founder Hans Enssner who started up EnssnerZeitgeist more than 60 years ago, the application of innovative solutions plays a central role in the future-oriented outlook of this long-established company. "We decided to choose Plunet because we need a business and workflow management system for all areas of our business which is not only capable of a high level of integration and is very adaptable, but which also offers carefully standardized working processes within the scope of our certified quality management processes. This is exactly where we see one of the major strengths of Plunet BusinessManager", explains Christian Enssner. He also appreciates the fact that the server-based structure of the business solution ensures that the new system is platform-independent. "Our employees and customers are spread all around the world. Even though the hardware and software they use can vary quite a lot, they are still able to use Plunet BusinessManager with no barriers whatsoever. This was not always possible with the software solution we had in place in the past", sums up Christian Enssner.

Plunet founder and CEO Stefan Dümig, who for many years has successfully been offering his services as a consultant to a wide range of language service providers on the subject of software-based process optimization, underlines the clear added value of Plunet BusinessManager. "Our customers can deal with projects much more quickly and transparently, make significant savings in terms of costs and time, and thus demonstrably increase their productivity." For the sales and marketing expert, the key is to offer a personal and continuous consultancy service. "We are delighted about the trust placed in Plunet by EnssnerZeitgeist, and look forward to a successful cooperation". Stefan Dümig closes by explaining that "the highly flexible BusinessManager system is the perfect software solution for the demands of a professional and quality-focused company".
