Press release from: [Swash Putting Schools](#)

Yes! Golf Asia continues the global success of Yes! Putter as they completed the 2008 Asian Tour season as the #2 most used putter in play and being the only putter in the top 4 positions to do so without a major club brand as a partner or by paying any of the players sponsorship money.

Yes! had 1 win in Macau, 33 top 10's and a total of 64 top 20's during the year in the events providing putter counts by the Asian Tour.

David Largent, Director of Yes! Golf Asia Ltd. based in Hong Kong, says "This shows how good our putters really are. To have this kind of success with the professionals without having to pay players to endorse us, and having so many top players using Yes!, shows that Yes! is recognized as a putter that works at the highest levels of competition. And the fact that our patented C-Groove technology also works exceptionally well to improve ball roll for regular golfers also shows why we have had our best sales year in Asia."

Yes! has maintained a strong presence the past 5 years under the guidance of the Yes! Tour representative, Shane Warde. Shane has worked closely with the players and made personal teaching and putter adjustments in order to make sure the players are playing to their fullest potential. Yes! is committed to putting like no other golf company and it shows in the results and in the passion of the people that support Yes!.

"As we look forward to a difficult year in 2009", says Mr. Largent, "people will look for the products that make a difference in their game and without following what they are told or mislead to believe in advertising and marketing claims. Yes! will continue to grow in the region with our distributors and we have a lot of new models and programs coming out that will further establish Yes! as a company that cares about our customers and we know how to improve their putting. We don't sell you a putter, we sell you the whole putting experience".

YES! C-Groove putters continue to gain popularity on the professional tours and in the golf shops. YES! putters are currently used by over 200 tour professionals worldwide. YES! Golf currently has over 30 models of C-Groove putters.

Yes! Golf, based in Denver, Colorado, is the proven leader in grooved putter technology. Harold Swash, known as the European putting doctor, introduced the innovative theory of concentric grooves in 1995. Today, C-Groove putters are taking

the golf world by storm making YES! Golf one of the fastest growing putters on the professional tours. For more information on YES! Golf, visit www.YesGolf.com or call Yes! Golf Asia Ltd. At +852 2889-1050
