

IDS Logic Launches New Web Site

Date: 02-09-2009 05:01 PM CET

Category: [IT, New Media & Software](#)

Press release from: [IDS Logic Pvt Ltd](#)

IDS Logic Pvt. Ltd, a leading IT outsourcing company providing Web hosting, Web designing, offshore software development and online marketing services, has redesigned its corporate Web site to address the increasing demand for IT outsourcing services. Visitors to IDS Logic can experience the 'all-new look and feel' at the new Web site www.idslogic.com.

With millions of Web sites on Internet, search engine optimization has become the first and foremost priority for all businesses. This situation has urged them to search for a reliable business partner to maintain and manage their online business successfully. IDS Logic has been a trusted outsourcing partner for many businesses from all across the world.

The new Web site provides more information to offshore clients who interact with IDS Logic on a day-to-day basis. New users can look for tailor-made solutions for their industry and pick the solutions from various categories listed on the Web site. The innovative navigation tools and user-friendly interface create a pleasant surfing experience to online customers.

“With this launch, IDS Logic has moved one more step ahead by innovating its services with new features,” said Ratnesh Dubey, director of Business Development at IDS Logic. “In today’s dynamic world, where change is inevitable, one has to evolve with time. To meet new challenges and achieve higher goals, IDS has launched its new Website with better interface, user friendliness and features.”

“IDS Logic is committed to offering higher levels of innovation and efficiency to improve the quality of its clients’ businesses,” Dubey added. “By offering a broad spectrum of services in Web based solutions and Internet based consultancy services, we ensure that our clients’ Web sites are recognized as the best by the search engines.”

Based in the national capital region (NCR) of India, the outsourcing hub of the world, IDS Logic offers cutting-edge solutions to all types of businesses looking to expand their business on Internet. IDS Logic offers services including Web design, offshore software development, Internet marketing services and Web hosting solutions to global clients. The company has strong expertise in Microsoft and open source (LAMP) technologies. IDS Logic is a premium partner of Rackspace, a leading and high security data center, providing world-class infrastructure to maintain dedicated Web servers 24x7x365.
